

DIGITAL LEARNING UNIT

FORMERLY TEAM DIGITAL

2021-ZUZZ DIGITAL LEARNING SPECIALISTS

Focus

Be United and Serve others.

Relationships

Our primary goal.
*To answer the **question** at the end of the day: "What did I do to improve digital learning for Arkansas Schools, Administrators, Teachers, and, most of all, Students today?"

Our goal, our task, our commitment:

Every student in the state of Arkansas must graduate proficient in the "third literacy."

Why?

The world equally distributes talent but not opportunity. Digital learning is the vehicle to disrupt that inequality and give access to opportunities that before were not there.

The Digital Learning Unit **provides:**

- **guidance, support, and training** for online and blended learning
- **assistance and professional learning** covering a wide variety of digital learning resources (including but not limited to collegial walkthroughs, designing online lesson content, training novice and experienced teachers in best practices for online teaching and learning)

We **support schools:**

- with and through ESCs as they adopt online providers and design their own online content, to **ensure the best digital learning experiences for students.**
- **educating stakeholders on best practices, and support districts** in their creation and implementation of digital learning plans
- **Through the PLC process** both in face-to-face and virtual formats, and provide our support as **thought partners as we navigate the digital landscape together.**

We also partner with digital learning entities like:

- Virtual Arkansas and Office of Innovation for Education to **support the implementation of quality digital content and professional learning**
- Educator Effectiveness for **support and assessment** with the Online Teaching and Learning Certification
- **Partnerships** with local ESCs, Multiple DESE Entities, and Higher Education programs
