

Vision, Hearing, and Scoliosis

New eSchool Referral Code Additions

VS – Virtual Student Not Screened

VS is used for all virtual students who do not get a vision, hearing or scoliosis screening, regardless of the reason (i.e. parent refuses). Data for students who are virtual and do not receive a vision screening will be collected and provided in a legislative report (A.C.A. §6-18-1803). Please allow the opportunity for a virtual student to be screened later in the year, even the second semester of school, before entering this information.

PR- Written Parent Refusal

PR is used for students who have a written statement of refusal for the intended vision, hearing, or scoliosis screening when attendance is on-site.

Leave data entry fields blank, go to “Referral”, select the above new codes with the date, and save for the student.

Body Mass Index

New eSchool Addition

Select ‘Reason Not Assessed’ and one of the following: (no longer used in comment section)

- HT – 2nd Height Measure Not Within 1 Inch
- AB – Absent
- CR – Child Refused
- OT – Other
- PR – Parent Refused
- PD – Physically Disabled
- PT – Pregnant
- WT – Weight Exceeded Scale

Immunizations

The most reliable report for immunizations of students is the “Validating Immunizations and Running Letters” in the eSchoolPlus+ Medical Training Guide, version 4.0. It is a two-step process outlined on pages 61-64. Cognos reports **do not** take into account 1) spacing of immunizations, 2) age of student when given, or 3) number of doses to be compliant.
